## A Confident Smile Will Change Someone's Day

**Give them a smile: a happy, friendly, and genuine smile. Go ahead, flash it; it's contagious, it's infectious, It's the universal expression of happiness. A simple smile can change someone's day.**

**Some people are a little nervous about smiling. They don't think their smile looks good, or they think that smiling makes them look unprofessional or vulnerable. No matter how professional, intelligent, or "together" you think a serious face makes you appear, people almost always respond better to a smile.**

**We all know of someone we consider to have an "infectious" smile. Infectious smiles always start with confidence. If you're not 100% confident in your smile, we're here to help.**

**While our first concern is keeping your teeth and mouth as healthy as possible, we have the tools and the training to make sure you have a smile that gives you confidence and a smile that you're excited to share with others.**

**We're more than happy to discuss with you the many options available to help you achieve a smile worth sharing and a smile that will change someone's day – including your own.**
